ISO

The international organization for the Standardization (ISO) was founded in Geneva, Switzerland. It is the world's largest developer and publisher of international standards. Its mission is to promote the development of the standardization and related activities to facilitate the international exchange of goods and services.

Brief History

1. Foundation (1947):

ISO was founded after the world war II when delegates from 25 countries met in London to discuss standardization.

2. Early years:

In its early years, ISO focused on creating standards to support industrialized and facilitate international trade.

3. Growth and Expansion:

over the years. ISO's membership has grown significantly, and it has developed thousands of standards covering almost every industry and sector imaginable.

4. ISO Standards:

ISO standards covers a wide range of topics, including quality management, environmental management, information security, food safety and many more.

5. ISO 9000 Series:

One of the ISO's well-known standards developed by ISO, which focuses on quality management systems.

6. ISO 14000 Series:

It is another important series of ISO is 14000 series, which deals with environmental management.

7. ISO 27000 Series:

ISO 27000 series addresses information security management System.

ISO standards are developed through a consensus-based process that involves experts from relevant industries, academia, government and consumers groups.

~(WTO)~

The World Trade Organization (WTO) is an international organization that regulates and facilitates international trade between nations. Here's a comprehensive overview:

Formation and History:

The WTO was established on January 1, 1995, succeeding the General Agreement on Tariffs and Trade (GATT), which was created in 1948. The transition to WTO marked a significant milestone in international trade governance, as it expanded the scope of trade negotiations and dispute resolution mechanisms.

Mission & Objectives:

The primary mission of WTO is to facilitate trade between nations by providing a platform for negotiations. Its main objectives include:

- 1: Promoting free and fair trade by reducing trade barriers such as tariffs and quotas.
- 2: Ensuring predictable and transparent trade policies through the establishment of rules and regulations.

- DATE: / /
5. Assisting developing countries in integrating into the global trading system and benefiting from trade opportunities.

Structure & Governance:

1. Ministerial Conference: The highest decision making body of WTO, where the representatives from member countries meet every two years to discuss trade issues and set the organization's agenda.

Dispute Settlement Body (DSB):
Facilitates the resolutions of disputes between member countries regarding trade issues.

Secretariat: Provides administrative and technical support to the WTO's operations led by the Director-General.

Functions & Activities:

- 1- Trade Negotiation: Facilitating negotiations among the member countries to liberalize trade and update trade rules.
- 2- Trade Monitoring:
Monitoring trade policies and practices of member countries to ensure the compliance with WTO agreements.

4. Trade policy reviews:

Conducting periodic reviews of member countries' trade policies and practices to enhance transparency and encourage adherence to WTO rules.

Overall, the WTO plays a crucial role in promoting global economic development, fostering cooperation among nations, and resolving trade disputes through a rule-based system.
