Subject: SDA

Department: BSSE-4-Afternoon

Date: 03-03-2024

Use case ID	01
Use case name	Process order
Actor	Sales assistant, customer, regional warehouse
Description	This use case describes the process of processing an order, either by immediate collection from the store or delivery to the customer's home address.
Pre-condition	Sales assistant has access to the system, product numbers and quantities are provided.
Post-condition	Order is processed, and receipt is produced.

Use case ID	02
Use case name	Create Backorder
Actor	Sales Assistant
Description	This use case allows the sales assistant to create a backorder for products not available in stock from the regional warehouse.
Pre-condition	Product is not available in the store's stock.
Post-condition	Backorder is created, and delivery to customer or store is arranged.

Use case ID	03
Use case name	Print Warehouse Order Details
Actor	Sales Assistant
Description	This use case involves printing order details for in-stock products in the warehouse for collection.
Pre-condition	Order is processed for in-stock products.
Post-condition	Order details are printed, and products are collected by the sales assistant.

Use case ID	04
Use case name	Refund
Actor	Sales assistant
Description	This use case allows the sales assistant to process refunds for products, provided a valid receipt is produced.
Pre-condition	Customer requests a refund with a valid receipt.
Post-condition	Refund is processed.

Use case ID	05
Use case name	Monitor Stock Levels
Actor	Stock Manager
Description	This use case involves the stock manager monitoring stock levels and requisitioning products as needed.
Pre-condition	Stock manager accesses the system.
Post-condition	Stock levels are monitored, and products are requisitioned as necessary.
