Incubator Case-study

- You are required to consider an incubator whose temperature has to be carefully controlled and monitored between -10°C to $+10^{\circ}\text{C}$.

Incubator Monitor

Temp: Celsius

-10C<Temp<+10C

Increment Temperature

 **Incubator Monitor**

 **Temp**

Temp<+10C
Temp'=Temp+1

Decrement Temperature

▲ Incubator Monitor

▲ Temp

Temp > -10C

Temp' = Temp - 1

Get Temperature

Incubator Monitor
