User Experience Design (UXD)

Lab Task 13

Task: IBM website evaluation

Name: Zulqarnain Hassan

Class: 6A Afternoon

Roll no: SP-21379

Assigned Date: 22 May, 2025

Deadline: 22 May, 2025

Marks Obtained	
Remarks	

Issues:

Evaluation

Match Between System and the Real World:

Issue: The term "AI agents" in the main headline might be a bit abstract for users who are new to the concept. While the sub-headline offers some context, it could be clearer what an "AI agent"

Optimize workflows across business
functions with AI agents that help you reach
your goals quickly and at scale

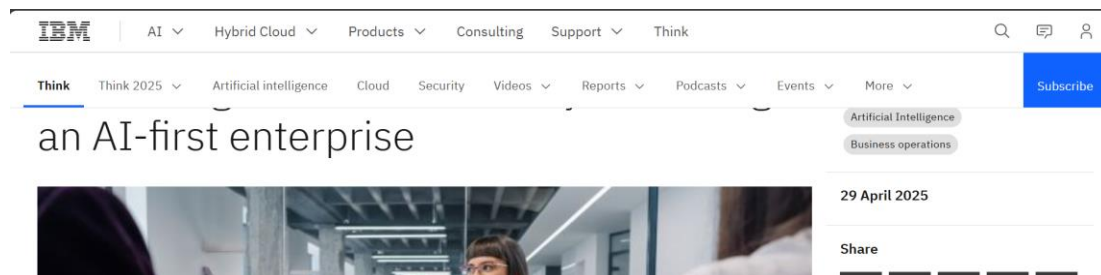

Recommendation:

Consider a concise, perhaps interactive, explanation of "AI agents" directly on the homepage, or link to a quick overview.

User Control and Freedom:

there isn't an obvious "undo" or "back" function within the flow presented by the static images.

your goals quickly and at scale

Recommendation

Ensure clear and consistent "back" or "undo" options are available on subsequent pages after a user initiates an action.

Consistency and Standards:

Issue:

The "Latest news" section uses a carousel with small dots for navigation, while the "Recommended for you" section and "Product announcements" are static grids or lists.

Product announcements

watsonx Orchestrate Agent for HR

Recommendation:

consistent display method for news and recommended content would improve predictability for the user.

Recognition Rather Than Recall:**Issue:**

some of the specific product names under "Product announcements" (e.g., "watsonx.data," "LinuxONE") might require users to recall what they are, rather than immediately recognizing their function from the name alone

Product announcements	
watsonx Orchestrate Agent for HR	→
watsonx.data	→
webMethods Hybrid Integration	→
LinuxONE 5	→
IBM Concert Resilience Posture	→

Recommendation:

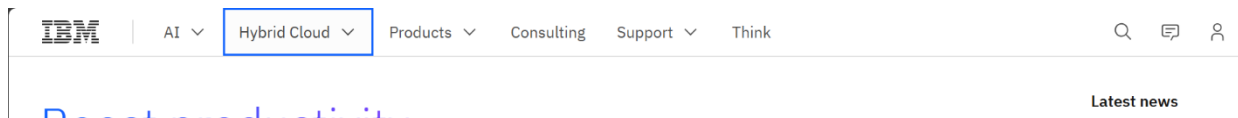

For less common product names, consider brief descriptive text or tooltips on hover to aid recognition

Flexibility and Efficiency of Use:

Issue:

For power users who might want to quickly access specific product information, the primary navigation at the top is comprehensive but doesn't immediately offer quick links to *all* products from the homepage.

Latest news

The University of

and IBM Extend
and Expand
Collaboration

Recommendations:

Consider adding a "quick links"

Aesthetic and Minimalist Design:

Issue:

The page is generally clean. However, the "Latest news" carousel and the "Recommended for you" section, while well-intentioned, add a fair amount of content below the fold. This could potentially lead to information overload for users whose primary goal is to quickly find solutions.

Recommended for you

Recommendation:

Consider if some of this content could be consolidated or accessed through a single entry point.

Help Users Recognize, Diagnose, and Recover from Errors:

From the “what’s new “ section there is no any back option or any recover option for ‘Subscribe‘ button if use click by mistakenly.
