Roll No: SP21379

Subject: Visual Programing

Department: BSSE-5-Afternoon

Date: 30-5-2025

```

internal class Department
{
    public int DepartmentId { get; set; } // Primary key
    public string DepartmentName { get; set; }
    public int NumberofFaculty { get; set; }
    public int NumberofStudent { get; set; }
}

namespace task2.Models
{
    internal class UniversityContext : DbContext
    {
        public UniversityContext() : base("UniversityDb") { }

        public DbSet<Department> Departments { get; set; }
    }
}

```

```

using System;
using System.Collections.Generic;
using System.ComponentModel;
using System.Data;
using System.Drawing;
using System.Linq;
using System.Text;
using System.Threading.Tasks;
using System.Windows.Forms;
using task2.Models;

namespace task2
{
    public partial class Form1 : Form
    {
        public Form1()
        {
            InitializeComponent();
        }

        private void Form1_Load(object sender, EventArgs e)
        {
        }

        private void btn_Click(object sender, EventArgs e)
        {
            using (var context = new UniversityContext())
            {
                if (!context.Departments.Any())
                {
                    context.Departments.Add(new Department
                    {
                        DepartmentName = "computer science",
                        NumberofFaculty = 10,

```

```

        NumberofStudent = 200
    });

    context.Departments.Add(new Department
    {
        DepartmentName = "Physics",
        NumberofFaculty = 5,
        NumberofStudent = 80
    });

    context.SaveChanges();
}

// Load data to DataGridView
dataGridView.DataSource = context.Departments.ToList();
}
}
}
}
}

```

The screenshot shows a Windows Form titled "Form1" with a standard Windows interface (title bar, minimize, maximize, close buttons). Inside the form, there is a DataGridView control. The DataGridView has five columns: "DepartmentId", "DepartmentName", "NumberofFaculty", and "NumberofStudent". The first row has values 1, Computer Science, 10, and 200. The second row has values 2, Physics, 5, and 80. The first row is selected. Below the DataGridView, there is a button labeled "load".

DepartmentId	DepartmentName	NumberofFaculty	NumberofStudent
1	Computer Science	10	200
2	Physics	5	80

load
