

Software Engineering

Quiz /Assignment plan for Fall 22

Note: There will be NO makeup for quiz/assignment

The tentative slots of each quiz/assignment are already shared

The syllabus for each quiz is also shared

All activities are already shared that will be performed throughout the semester

Its upto students to manage accordingly.

Activities will be performed and submitted within class time. We will try to discuss all activities for your feedback, try o manage your time accordingly

Marks will be given to those only present in class

Group members who will be absent during activity time will be given zero

Date	Name	Artifact	CLO	Question	Notes	Marks
19 th Sept	A1	Activity	CLO1	Suggest the most suitable model for the given scenario. Justify your answer	- Group activity -will be performed in class -in second slot	10
26 th Sept	Q1	Quiz	CLO1	A practice activity from process models	- INDIVIDUAL -From Lecture 01 – Lecture 06 - in second slot	10
3 rd Oct	A ₀	Activity		Practice activity on use cases	Practice	
	Q2	Quiz	CLO1		- INDIVIDUAL quiz -From Lecture 07 - in second slot	05
10 th Oct	A2	Activity	CLO2	Analyse the given scenario to develop a use case model	- Group activity -will be performed in class -in second slot	10
17 th Oct	Q2	Quiz	CLO2		- INDIVIDUAL -From Lecture 08– Lecture 10 - in second slot	10
24 th Oct	A ₀	Activity		Practice activity on OOAD	Practice	

31st Oct	A ₀	Activity		Practice activity on Design	Practice	
21 st Nov	A3	Activity	CLO3	Design the given scenario given the suggested artifact	- Group activity -will be performed in class -in second slot	10
28 th Nov	Q3	Quiz	CLO3		- INDIVIDUAL -From Lecture 15– Lecture 17 - in second slot	
5 th Dec	A4	Activity	CLO3	Apply testing techniques on the given scenario	- Group activity -will be performed in class -in second slot	10
12 th Dec	Q4	Quiz			- INDIVIDUAL -From Lecture 20-23 - in second slot	
19 th December onwards	P	Presentation		Oral presentation of each student (with slideshow)	- INDIVIDUAL Details of presentations are given below	20

Presentation Topics

Software Engineering

Fall 2022

Students can select ANY ONE of the following topics for presentations

(For your ease, a little briefing of these topics is given below)

1. Software Re-engineering
2. Software Design Patterns
3. Computer Aided Software Engineering

Important dates:

Selection of presentation topic	Before 26 th September 2022
1 st Draft submission*	Before 7 th November 2022
In-class oral presentations	Mid Dec 2022 onwards

**Draft can be a rough draft even to show you have started working on presentation. Marks will be given for timely submission of draft*

Presentation Topics Briefing:

1. Software Reengineering
Software Reengineering is **the process of updating software**. This process includes developing additional features on the software and adding functionalities for better and more efficient software. As far as the definition goes, this process also entails that the software product will have improved maintainability.
2. Software Design Patterns
In software engineering, a **design pattern** is a general repeatable solution to a commonly occurring problem in software design. A design pattern isn't a finished design that can be transformed directly into code. It is a description or template for how to solve a problem that can be used in many different situations.
3. Computer Aided Software Engineering
Computer-aided software engineering (CASE) describes **a broad set of labor-saving tools used in software development**. They create a framework for managing projects and are intended to help users stay organized and improve productivity
